

COURSE DESCRIPTION

COURSE DETAILS

Title (of the course): **GESTIÓN MEDIOAMBIENTAL EN LA INDUSTRIA ALIMENTARIA**
 Code: 102238
 Degree/Master: **GRADO DE CIENCIA Y TECNOLOGÍA DE LOS ALIMENTOS** Year: 3
 Name of the module to which it belongs: GESTIÓN Y CALIDAD EN LA INDUSTRIA ALIMENTARIA
 Field: GESTIÓN Y CALIDAD EN LA INDUSTRIA ALIMENTARIA
 Character: OBLIGATORIA Duration: FIRST TERM
 ECTS Credits: 6.0 Classroom hours: 60
 Face-to-face classroom percentage: 40% Study hours: 90
 Online platform:

LECTURER INFORMATION

Name: SILES LÓPEZ, JOSÉ ÁNGEL (Coordinador)
 Department: QUÍMICA INORGÁNICA E INGENIERÍA QUÍMICA
 Area: INGENIERÍA QUÍMICA
 Office location: Edificio Marie Curie (C-3), planta baja.
 E-Mail: a92siloj@uco.es Phone: 957218624

Name: MÁRQUEZ GARCÍA, PEDRO
 Department: QUÍMICA INORGÁNICA E INGENIERÍA QUÍMICA
 Area: INGENIERÍA QUÍMICA
 Office location: Edificio Marie Curie (C-3), planta baja.
 E-Mail: a12magap@uco.es Phone: 957218586

PREREQUISITES AND RECOMMENDATIONS

Prerequisites established in the study plan

None.

Recommendations

It is recommended that the students have previously taken the subjects included in the Common Basic Training

INTENDED LEARNING OUTCOMES

- | | |
|------|---|
| CB3 | Students must possess the capacity to gather and interpret relevant information (usually in their field of study) in order to give opinions which include a reflection about relevant topics which are social, scientific or ethic in nature. |
| CB4 | Students must transmit information, ideas, problems and answers to both specialised and not specialised publics. |
| CE9 | To develop protocols of environmental management and food industries quality control. |
| CT12 | Ability for the information management. |
| CT13 | Ability to adapt to new situations. |
| CT14 | Sensitivity to environmental and social issues. |
| CT15 | To be able to design and process projects |
| CT3 | Ability to work as a team. |
| CT5 | Ability to take decisions. |

COURSE DESCRIPTION

- CU1 To accredit the use and proficiency of a foreign language.
- CU2 To know and improve the user level in the field of ICT.
- CU3 To increase the habits of an active searching for employment and the capacity of entrepreneurship.

OBJECTIVES

This subject is supposed to be an introduction to the basic principles of the management and physical, chemical and biological treatments of different types of waste, including municipal and industrial streams, especially derived from industrial processes.

Especific objectives:

1. To know the fundamentals of environmental management in the food industry.
2. To know the legislation applicable to wastewater treatment, waste and emissions to the atmosphere.
3. To know the fundamentals of the procedures to manage, treat and remove waste derived from the food industry.
4. To know the different types of physical, chemical and biological treatments of wastewaters derived from the agri-food industry, as well as the main parameters used to evaluate its composition.
5. To know the technologies available to minimise and monitor the gaseous emissions from the food industry.

CONTENT

1. Theory contents

The environmental management in the food industry. Environmental Authorisation. Emission register. Environmental management systems (ISO 14001 and others). Other environmental tools.

Characterization of organic wastewater and evaluation of physical, chemical and biological treatments for the purification of wastewater derived from the agri-food industry.

Fundamentals of the procedures to manage, treat and remove waste derived from the food industry.

Technologies to minimise and monitor gaseous emissions from the food industry.

Legislation related to water, solid waste and air emissions.

2. Practical contents

Several practical lessons about wastewater characterisation will be carried out at laboratory scale, as well as classroom seminars and case studies, in order to develop the following capacities:

-Capacity to organise, to plan, to analyse and to make decisions related to managing different types of wastes and emissions derived from the food industry.

METHODOLOGY

Methodological adaptations for part-time students and students with disabilities and special educational needs

Part-time students will agree with the teacher the methodology and evaluation criteria to pass the subject.

Face-to-face activities

Activity	Large group	Medium group	Total
<i>Assessment activities</i>	6	-	6
<i>Case study</i>	-	2	2

COURSE DESCRIPTION

Activity	Large group	Medium group	Total
<i>Group work (cooperative)</i>	-	6	6
<i>Lab practice</i>	-	6	6
<i>Lectures</i>	30	-	30

¿Valora la asistencia?:

No

General clarifications on instruments for evaluation:

The mark obtained by those students not reaching the minimum qualification in all the evaluation tools required to pass the subject will be 4.0 (fail).

Clarifications on the methodology for part-time students and students with disabilities and special educational needs:

Part-time students will agree with the teachers the methodology and evaluation criteria to pass the subject.

Qualifying criteria for obtaining honors:

Podrá optar a Matrícula de Honor el alumnado con una nota final superior a 9,5, debiendo superar para ello una prueba específica.
