

COURSE DESCRIPTION

COURSE DETAILS

Title (of the course): **QUÍMICA BIOORGÁNICA**

Code: 101866

Degree/Master: **GRADO DE BIOQUÍMICA**

Year: 4

Field: QUÍMICA BIOORGÁNICA

Character: OPTATIVA

Duration: FIRST TERM

ECTS Credits: 6.0

Classroom hours: 60

Face-to-face classroom percentage: 40.0%

Study hours: 90

Online platform: <http://moodle.uco.es/m2223/>

LECTURER INFORMATION

Name: ROMERO REYES, ANTONIO ANGEL (Coordinator)

Department: QUÍMICA ORGÁNICA

Area: QUÍMICA ORGÁNICA

Office location: Edificio Marie Curie (C-3, anexo)

E-Mail: qo1rorea@uco.es

Phone: 957218638

URL web: <http://moodle.uco.es/m2223/>

Name: LUQUE ÁLVAREZ DE SOTOMAYOR, RAFAEL

Department: QUÍMICA ORGÁNICA

Area: QUÍMICA ORGÁNICA

Office location: Edificio Marie Curie (C-3, anexo)

E-Mail: q62alsor@uco.es

Phone: 957218638

URL web: www.uco.es/users/q62alsor

PREREQUISITES AND RECOMMENDATIONS

Prerequisites established in the study plan

The student can enroll in elective subjects/courses once he/she has passed the 60 credits corresponding to basic training and, at least, 60 additional compulsory credits.

To have at least a B1 level in English (this requirement is mandatory for the recognition of having taken the subject in English according to the Plurilingualism Programme of the University of Córdoba).

Recommendations

To have a basic understanding of Chemistry and particularly of Organic Chemistry.

English level B2 is highly recommended.

COURSE DESCRIPTION

INTENDED LEARNING OUTCOMES

CB1	Ability for critical and self-critical thinking.
CB2	To know how to work in cooperation collaboratively and with shared responsibility.
CB4	To have learning and autonomous work capacity
CB5	To be able to employ principles of the scientific method.
CB7	To know how to use basic tools for communication, search for information and data processing in their professional activity.
CE1	To understand the physical and chemical bases of biological processes and the main physical, chemical and mathematical tools used to investigate them.
CE3	To understand the basic principles that determine molecular structure and chemical reactivity of simple biomolecules.
CE4	To understand the principles that determine the structure of the biological macromolecules (including proteins and nucleic acids), as well as the biological supramolecular complexes, and to be able to explain the relationships between the structure and its function.
CE22	To know how to work appropriately in a biochemical laboratory with biological and chemical material, including safety, handling, removal of biological and chemical wastes and inscribed record of activities.

OBJECTIVES

- To know some families of organic compounds of interest in Biochemistry.
- To understand the basic principles of Biocatalysis.
- To apply methods and techniques from Organic Chemistry to solve biological problems

CONTENT

1. Theory contents

Unit 1. Introduction to Bioorganic Chemistry and Natural Products.

Unit 2. Terpenes and steroids. Structure and classification. Compounds of biological importance.

Unit 3. Heterocyclic compounds of biological interest. Alkaloids. Structure and classification. Biochemical significance.

Unit 4. Application of biocatalysts in chemical synthesis. Enzymes. Hydrolytic reactions, redox processes and formation of C-C bonds. Other reactions catalyzed by enzymes. Use of enzymes in organic solvents. Immobilization of enzymes. Antibodies. Catalysis with antibodies. Applications of catalytic antibodies.

Unit 5. Supramolecular chemistry. Introduction to supramolecular chemistry: molecular recognition, self-assembly and self-organization. Artificial enzymes. Coronands and cavitands.

Unit 6. Combinatorial chemistry. Application to drug discovery.

2. Practical contents

PRACTICE 1. ISOLATION OF EUGENOL FROM THE NAIL.

PRACTICE 2. SYNTHESIS OF ETHANOL BY SACROSE FERMENTATION.

PRACTICE 3. ISOLATION OF ESSENTIAL OILS OF LAVENDER.

PRACTICE 4. HYDROALCOHOLIC GEL SYNTHESIS.

PRACTICES 5 and 6. OPTICAL RESOLUTION THROUGH NATURAL AND OPTICALLY ACTIVE TARTARIC ACID.

COURSE DESCRIPTION

SUSTAINABLE DEVELOPMENT GOALS RELATED TO THE CONTENT

Industry, innovation and infrastructure

METHODOLOGY

Methodological adaptations for part-time students and students with disabilities and special educational needs

Their availability will be taken into account. Some agreements between the lecturer and the students will be needed.

Face-to-face activities

Activity	Large group	Medium group	Total
<i>Assessment activities</i>	3	-	3
<i>Lab practice</i>	-	18	18
<i>Lectures</i>	30	-	30
<i>Seminar</i>	-	6	6
<i>Text analysis</i>	-	3	3
Total hours:	33	27	60

Off-site activities

Activity	Total
<i>Analysis</i>	20
<i>Exercises</i>	10
<i>Information search</i>	5
<i>Reference search</i>	5
<i>Self-study</i>	50
Total hours	90

WORK MATERIALS FOR STUDENTS

COURSE DESCRIPTION

EVALUATION

Intended learning	Exams	Laboratory Practice	Oral Presentation	Practice Book
CB1	X	X	X	X
CB2	X		X	
CB4	X		X	
CB5		X		X
CB7			X	
CE1	X	X	X	X
CE22	X		X	
CE3		X		X
CE4	X		X	
Total (100%)	60%	10%	20%	10%
Minimum grade	5	5	5	5

(*)Minimum mark (out of 10) needed for the assessment tool to be weighted in the course final mark. In any case, final mark must be 5,0 or higher to pass the course.

Method of assessment of attendance:

Attendance and active participation will constitute 10% of the final grade.

General clarifications on instruments for evaluation:

Minimum score to eliminate content and period of validity for partial qualifications: Minimum grade of 4 to pass the subject. Valid for the present academic year.

Clarifications on the methodology for part-time students and students with disabilities and special educational needs:

Their availability will be taken into account. Some agreements between the lecturer and the students will be needed.

Clarifications on the evaluation of the first extraordinary call and extra-ordinary call for completion studies:

In the evaluation, the same criteria will be applied as in the ordinary evaluation, that is, the qualifications of attendance to classes, seminars and practices of the previous year are maintained.

Qualifying criteria for obtaining honors:

It can be given to students with a grade equal to or greater than 9. This mention can not exceed 5% of the students.

The methodological strategies and the evaluation system contemplated in this Course Description will be adapted according to the needs presented by students with disabilities and special educational needs in the cases that are required.

CONTINGENCY PLAN: CASE SCENARIO A

Case scenario A will correspond to a diminished on-site academic activity due to social distancing measures affecting the permitted capacity of classrooms.

METHODOLOGY

General clarifications on the methodology on case scenario A

A multimodal (hybrid) teaching system will be adopted, combining both on-site and remote classes via videoconference (synchronous) that will be held in the timetable approved by the corresponding Faculty or School. The time distribution of teaching activities (both on-site and remote) will be decided by the aforementioned Faculties and Schools bearing in mind the permitted capacity of classrooms and social distancing measures as established at that time.

(*)Minimum mark (out of 10) needed for the assessment tool to be weighted in the course final mark. In any case, final mark must be 5,0 or higher to pass the course.

Method of assessment of attendance (Scenario A):

Attendance and active participation will constitute 10% of the final grade.

General clarifications on instruments for evaluation (Scenario A):

Minimum score to eliminate content and period of validity for partial qualifications: Minimum grade of 4 to pass the subject. Valid for the present academic year.

Clarifications on the methodology for part-time students and students with disabilities and special educational needs (Scenario A):

Their availability will be taken into account. Some agreements between the lecturer and the students will be needed.

CONTINGENCY PLAN: CASE SCENARIO B

Case scenario B will bring about a suspension of all on-site academic activities as a consequence of health measures.

COURSE DESCRIPTION

METHODOLOGY

General clarifications on the methodology on case scenario B

On-site teaching activities will be held via videoconference (synchronous) in the timetable approved by the corresponding Faculty or School. Alternative activities will be proposed for reduced groups in order to guarantee the acquisition of course competences.
