METHODOLOGY

General clarifications on the methodology (optional)

The methodology of this course in English will be student-centred and aimed at enhancing students' language skills (listening, reading, spoken interaction, spoken production and writing), creativity and self-confidence in using English to communicate with native and nonnative speakers of the language, in both speaking and writing. Therefore, students are expected to get actively involved in class dynamics, participate in the teaching-learning tasks proposed by the teacher, and contribute to the whole learning process in a wide range of individual, pair and group activities.

The approach to English learning will be communicative, functional and pragmatic, and so the English language will be not merely an object to be subjected to theoretical scrutiny, but a genuine vehicle of communication and a tool of knowledge to access interesting interdisciplinary subjects which are absolutely relevant in today's world. In order to expose students to as much relevant input as possible, English will be the common language of classroom management and communication.

Oral presentations will take place during the course.

The textbook used in this course will be the same as the one used in the previous one, Lengua CI (Inglés) (see Bibliography).

Methodological adaptations for part-time students and students with disabilities and special educational needs

Part-time students who cannot attend classes on a regular basis are required to inform the teacher of their personal circumstances as soon as possible so as to provide for the necessary assessment procedures. In any case, these students are required to comply with the same assessment criteria to get a pass on this course.
