

AÑO 2020

1. *Fabric phase sorptive extraction for the determination of 17 multiclass fungicides in environmental water by gas chromatography-tandem mass spectrometry.* Celeiro, M., Vazquez, L., Nurerk, P., Kabir, A., Furton, K.G., Dagnac, T., Llompert, M. (2020) *Journal of Separation Science*, 43 (9-10), pp. 1817-1829. doi.org/10.1002/jssc.201901232
2. *High-throughput microscale extraction using ionic liquids and derivatives: A review.* Trujillo-Rodríguez, M.J., Pino, V., Miró, M. (2020) *Journal of Separation Science*, 43 (9-10), pp. 1890-1907. doi.org/10.1002/jssc.202000045
3. *Development of an analytical methodology based on fabric phase sorptive extraction followed by gas chromatography tandem mass spectrometry to determine UV filters in environmental and recreational waters.* Celeiro, M., Acerbi, R., Kabir, A., Furton, K.G., Llompert, M. (2020) *Analytica Chimica Acta: X*. doi.org/10.1016/j.acax.2019.100038
4. *Biopolymers in sorbent-based microextraction methods.* Pacheco-Fernández, I., Allgaier-Díaz, D.W., Mastellone, G., Cagliero, C., Díaz, D.D., Pino, V. (2020) *TrAC - Trends in Analytical Chemistry*, 125. doi.org/10.1016/j.trac.2020.115839
5. *Use of a pH-sensitive polymer in a microextraction and preconcentration method directly combined with high-performance liquid chromatography.* González-Martín, R., Pacheco-Fernández, I., Maiti, B., Ayala, J.H., Afonso, A.M., Díaz, D.D., Pino, V. (2020) *Journal of Chromatography A*, 1619, art. no. 460910. doi.org/10.1016/j.chroma.2020.460910
6. *3D printed fluidic platform with in-situ covalently immobilized polymer monolithic column for automatic solid-phase extraction.* Carrasco-Correa, E.J., Cocovi-Solberg, D.J., Herrero-Martínez, J.M., Simó-Alfonso, E.F., Miró, M. (2020) *Analytica Chimica Acta*, 1111, pp. 40-48. doi.org/10.1016/j.aca.2020.03.033
7. *Determination of benzomercaptans in environmental complex samples by combining zeolitic imidazolate framework-8-based solid-phase extraction and high-performance liquid chromatography with UV detection.* Martínez-Pérez-Cejuela, H., Mompó-Roselló, Ó., Crespi-Sánchez, N., Palomino Cabello, C., Catalá-Icardo, M., Simó-Alfonso, E.F., Herrero-Martínez, J.M. (2020) *Journal of Chromatography A*, 1631, 461580. doi.org/10.1016/j.chroma.2020.461580
8. *Recent advances in affinity MOF-based sorbents with sample preparation purposes.* Pérez-Cejuela, H.M., Herrero-Martínez, J.M., Simó-Alfonso, E.F. (2020) *Molecules*, 25 (18), art. no. 4216. doi.org/10.3390/molecules25184216
9. *Turning cork by-products into smart and green materials for solid-phase extraction - gas chromatography tandem mass spectrometry analysis of fungicides in water.* Celeiro, M.,

Vazquez, L., Sergazina, M., Docampo, S., Dagnac, T., Vilar, V.J.P., Llompart, M. (2020) *Journal of Chromatography A*, 1628, art. no. 461437. doi.org/10.1016/j.chroma.2020.461437

10. *Magnetic dispersive solid-phase extraction using a zeolite-based composite for direct electrochemical determination of lead(II) in urine using screen-printed electrodes.* Fernández, E.; Vidal, L.; Silvestre-Albero, J.; Canals, A. *Microchimica Acta*, 187, 87 (2020). doi.org/10.1007/s00604-019-4062-9
11. *Magnetic dispersive solid-phase extraction using ZSM-5 zeolite/Fe₂O₃ composite coupled with screen-printed electrodes based electrochemical detector for determination of cadmium in urine samples.* Baile, P.; Vidal, L.; Canals, A. *Talanta*, 220, 121394 (2020). doi.org/10.1016/j.talanta.2020.121394
12. *Determination of cadmium in used engine oil, gasoline and diesel by electrothermal atomic absorption spectrometry using magnetic ionic liquid-based dispersive liquid-liquid microextraction.* Aguirre, M.A.; Canals, A.; López-García, I.; Hernández-Córdoba, M. *Talanta*, 220, 121395 (2020). doi.org/10.1016/j.talanta.2020.121395
13. *Determination of four bisphenols in water and urine samples by magnetic dispersive solid-phase extraction using a modified zeolite/iron oxide composite prior to liquid chromatography diode array detection.* Baile, P.; Medina, J.; Vidal, L.; Canals, A. *Journal of Separation Science*, 43, 1808-1816 (2020). doi.org/10.1002/jssc.201901022
