Obsequies of My Lady Mary (II):
A Fragmentary Syriac Palimpsest Manuscript
from Deir al-Suryan
(BL, Add 14.665, no. 2)

Research History

The publication process for the Syriac witnesses of the five-book version or palm tradition of the Liber requiei Mariae running in Syriac under the titles ܐܘܦܝܐ (‘uppāyā) ‘interment’ or ܕܣܪܬܝ ܣܪܝܥ ܠܘܘܗ ‘Obsequies of My Lady Mary’, and surviving only in the form of single or fragmentary early manuscripts (5th to 6th century), mostly in palimpsests, has been more than neglected. This singular Syriac transmission of the apocryphal Marian text (S1) has

1 W. Wright, Contributions to the Apocryphal Literature of the New Testament (London: Williams & Norgate, 1865), p. 11. There must have been two different printings as one print does not contain the fragmentary Syriac Obsequies material on pp. 11-15 (e.g. the copy in Cornell University Library), but it has a preface with the same page numbers. The title pages are identical in both printings.

2 BL, Add 17.137, no. 2 (A), fols. 9, 6 (top), 7 (bottom) [no. 465], and Add 14.665, no. 2 [no. 507] are two early fifth-century palimpsest manuscripts without additional grammatical diacritical points except for the ܦܝܡܨ, the supralinear dot for the feminine pronominal suffix ܗܿ ܗ, the far-deixis ܘܿ ܗ, and the interrogative pronoun ܣܗܿܨ ‘what’, while Add 14.484, fols. 1-8 [no. 158] is not a palimpsest and already shows the additional points to distinguish homographic spellings for various grammatical forms, but has the typical open shaped letters like ܒ, ܘܘ, and ܡܠ for a fifth- to sixth-century Syriac manuscript.

not received the attention that one would have expected for such an early and unique Syriac text source within the apocryphal studies, despite having been known for a long time.

Meanwhile it has emerged that all remaining Syriac text witnesses follow a rather deviating Greek version. It also supports the fact that a longer Greek transmission of the five-book or palm version must have circulated as can be deduced from Christian Palestinian Aramaic translation depending on the Greek version, from the much longer known and late Ethiopic transmission, and now the Syriac text samples. Hardly any attempts have been made yet to fill this gap by publishing the incompletely preserved Syriac palimpsest folios which came to the attention of the scholarly readership with the publication of the Syriac catalogues of the British Museum 1870-1872, and the preceding monograph on Syriac apocryphal literature by Wright in 1865. The content of the surviving fragments in Syriac and Christian Palestinian Aramaic changes the picture of the transmissions of the palm tradition considerably. The longer version was translated, copied, and distributed on the periphery as early as the fifth-century AD in Palestine (CPA) and Upper Mesopotamia (Syriac) and much later in Ethiopic.

All the Syriac text witnesses containing the Obsequies originate from among the collection of 250 Syriac manuscripts bought and collected by Abbot Mushē of Nisibis in Northern Mesopotamia and Babylonia in the 10th century, when they were taken by him to be stored in the monastery Deir al-Suryan, at that time a Syrian Orthodox monastery in the Skete Desert, Egypt. Among them are found a number of fragmentary parchment manuscripts, two of them being very early palimpsests (5th century), which preserve unpublished and noteworthy sections of the Syriac Obsequies. They are housed today in the

---

6 One of them is BL, Add 17.137, no. 2 (A), folios 9, 6 (top), 7 (bottom); see C. Müller-Kessler, *Obsequies of My Lady Mary* (I): Unpublished Syriac Palimpsest Fragments from the British Library (BL, Add 17.137, no. 2), *Hugoya* 23 (2020), pp. 31-59.

8 Wright, *Contributions*, p. 13-16.

British Library, but were formerly acquired by the British Museum in the first part of the nineteenth century and later catalogued by Wright in his three-volume edition of 1870-1872. Before the catalogues’ publication Wright provided a few samples as demonstration from two incompletely preserved manuscripts and two independent fly leaves in his Contributions to the Apocryphal Literature of 1865. Since then the matter has remained in a status quo and no real start has been made to edit them fully, or to offer a revised and collated readings, especially for two preserved palimpsest folios under BL, Add 17.137, 14.

11 Wright, Catalogue, vol. 1, p. 389 (no. 507), 2, fols. 21-24: “The older text is written in a fine, regular Estrangela of the Vth or VIth cent., in two columns of 26 or 27 lines, and once formed part of the apocryphal אונס, אונס, אונס, Add. 14,484, foll. 1-8”.

12 Wright, Contributions, pp. 11-15.

13 Only Shoemaker, “New Syriac Dormition Fragments”, p. 263, recently made a start by publishing the left-hand column of the recto side of Add 17.137, fol. 9. Meanwhile the other sections of Add 17.137 could be added in Müller-Kessler, Obsequies of My Lady Mary (I), pp. 31-59.

14 Scholars who dealt with issues of the Obsequies from various Syriac sources have relied again and again on the rather limited text samples from the BL, Add 14.665 text witness that were published in 1865 by Wright, Contributions, pp. 11-15. These passages have been simply repeated or translated for their own studies on the Liber requiei Mariae. Among them is A. Wenger, L’Assomption de la T.S. Vierge dans la tradition byzantine du V au Xe siècle «Archives de l’Orient Chrétien» (Paris: Institut Français d’Études Byzantines, 1955), pp. 200-261. In this study Wenger speaks in n. 1 of the fragments (Add 14.665, fols. 21-24) having many lacunae or being improbable in their translation. Without going back to the originals this is a rather weak argument. Also Arras, De Transitus Mariae, pp. VI-VII, went by the primary work of Wright, but the Syriac witnesses were not within the scope of his edition. The same applies to the detailed study on the Marian apocryphon by van Esbroeck, “Les textes littéraires sur l’Assomption”, pp. 265-285, who does not even mention the fragmentary passages from Add 14.665, and the manuscripts as Add 17.137 and others, but only lists Add. 14.484 for S1. Again for the collective monograph by Shoemaker, Ancient Traditions, pp. 325-328, the surviving material was not collated. The study by S. Spreckelsmeier, Bibelgeschichtliche Erzählungen vom ‘Transitus Mariae’ im Mittelalter «Literatur - Theorie - Geschichte 14» (Berlin: de Gruyter, 2019), omits the recent publications of the earliest Syriac texts by Shoemaker, New Syriac Dormition Fragments, and S. P. Brock and G. Kessel, “The ‘Departure of Mary’ in Two Palimpsests at the Monastery of St. Catherine (Sinai Syr. 30 & Sinai Arabic 514)”, Christian Orient: Journal of Studies in the Christian Cultures of Asia and Africa 8 (2017), pp. 115-152. This claim, however, cannot be sustained, since the surviving Syriac tradition of the “five book” version obviously follows a diverging Greek transmission which is lost today. The early sources preserve important sections of a longer version. Without the missing Greek link one cannot reach a satisfactory conclusion concerning its possible deviation and “Sitz im Leben”.

15 A nearly complete reading of the two surviving Syriac folios comprising §§ 98-104 was added by Müller-Kessler, Obsequies of My Lady Mary (I), pp. 43-59, preceded by the publication of one column by Shoemaker, “New Syriac Dormition Fragments”, p. 263. The remaining four, actually five folios, under the same shelf mark, formerly claimed to belong to the Obsequies by Wright, Catalogue, p. 389, and his successors, are not part of this text. They contain the Homily of the Presentation in the Temple by the fifth- to sixth-century Syriac writer Jacob of Serugh, the earliest palimpsest and text witness for this author from Mesopotamia so far; see C. Müller-Kessler, “Jacob of Serugh’s Homily on the Presentation in the Temple in an Early Syriac Palimpsest (BL, Add 17.137, no. 2)”, ARAM 32 (2020), pp. 9-16.
and the unedited parts of BL, Add 14.665, no. 2. They are in so far relevant to apocryphal studies, as they form the earliest surviving witnesses transmitting important sections for the more than incomplete and deviating Syriac transmission of the five-book version of the *Dormition of Mary* or *Obsequies of My Lady Mary* and provide new and early language data for Classical Syriac.

**Manuscripts of the Syriac Obsequies of Mary**

The Syriac *Obsequies of Mary* are preserved in three fragmentary manuscripts and two single mutilated leaves, all written on parchment. It covers the following text numbers: BL, Add 14.484, fols. 1-8; Add 14.665, fols. 21-24; Add 17.137, fols. 6(top)+7(bottom), 9; Add 17.216?, fol. 17 as well as Add 14.669, fol. 39. The content of the surviving folios (5th to 6th century AD) demonstrates an independent transmission deviating from the Western Aramaic sources and translated into Christian Palestinian Aramaic (5th to 6th century). The latter Palestinian witness is also just preserved in four fragmentary palimpsest manuscripts without overlapping each other in content, and were only edited recently. As a western Melkite source it has from the contextual point of view more in common with the late Ethiopic transmission despite the translation or better the copies being one thousand years apart. It does not show much similarity with the Coptic tradition. The latter is also only scantily transmitted and diverges from the Greek, and is perhaps influenced by Egyptian thought.

The publication of the new and previously only partially edited Syriac palimpsest fragments is a new starting point for textual criticism and theological appreciation of this

---

16 Wright, *Contributions*, p. 13-16. 
17 Edited by Wright, *Contributions*, pp. 45-55 (ܡܘܼܐܒܐ-
19 See Müller-Kessler, *Obsequies of My Lady Mary* (I), pp. 31-59. 
20 Fol. 17 said to be bound in the volume under Add 17.216, is definitely not the fragment with the *Obsequies* text as listed by Wright, *Contributions*, pp. 11-13. The same is true for Add 14.484, fol. 6 on p. 13 and Add. 14.669, fol. 39. I ordered all three manuscript volumes several times in the Asian and African Studies reading room of the British Library. They cannot be found under these arbitrarily bound shelf marks. It would take some time to trace the correct shelf mark and folio numbers among the Syriac Addendum collection. Interestingly, they could also not be traced by Brock, *An Inventory of Syriac Texts*. 
22 See Arras, *De Transitu Mariae*. 
variously transmitted Marian apocryphon. A still glaring lacuna, however, remains, in the missing complete Greek forerunner of the five-book tradition. It can be only postulated and assumed by the complete Ethiopic transmission (15th to 18th century), and nearer in time by the fragmentary Christian Palestinian Aramaic witnesses (5th to 6th century), as well as now by this early Syriac source. That no text source has surfaced for the longer and early Greek tradition is still a deplorable gap in the history of this apocryphal text, especially for a manuscript treasure horde like the Monastery of St Catherine on Sinai, where Melkite monks translated this Dormition composition directly into Christian Palestinian Aramaic from Greek Vorlagen, definitely predating this dependent Western Aramaic language source. In the East circulated obviously another Greek tradition that formed the text basis for the Syriac translations. The best proof for this are the additional paragraphs 68-69 (according to the Ethiopic subdivision) not found in the short Greek version, which are now attested in Add 14.665, fol. 2225 (see below), and the unparalleled addition in Add 17.137, fol. 9ra.26 It is hardly conceivable that Syriac translators were so liberal as to revise the text for their purposes. The other western and late Coptic transmission is much freer in its translation of the Transitus Mariae text, but in it hardly any sufficient text basis has survived except for four partially incomplete folios.27

Given the fact that only the short Greek version exists so far from late attested copies (ca. 11th century),28 one should ask, if this was intentionally caused by the Orthodox Greek doctrine to accept and transmit just shorter aspects of the death and burial story of Mary. Other Eastern and Western Orthodox Christian churches continued to translate, copy, and transmit a longer apocryphal version, peripheral or not. In Greek Orthodox church circles, however, the copying tradition obviously did not continue for longer than beyond the sixth century judging by the existing textual evidence in the dependent Christian Palestinian Aramaic sources. It is rather striking that even for the early Syriac Obsequies version no tradition existed to copy this Marian apocryphon in later periods among Syrian church communities. One of the possible answers could be that these text copies might be lost today.29

24 It should be pointed out again within this context that the Christian Palestinian Aramaic text corpus is always dependent on Greek Vorlagen, since its literature is known for having only produced translations directly and literally from Greek, which makes its early text transmission interesting for the today missing and preceding Greek sources.

25 Both paragraphs are not provided in the readings by Wright, Contributions, p. 14.

26 See Müller-Kessler, Obsequies of My Lady Mary (I), pp. 43-45.

27 Förster, Transitus Mariae.

29 Such statements are always risky, since unknown texts might be hidden somewhere without being read or discovered yet. One must, however, also take all early texts losses from Mesopotamia into account, of which none would have survived without the diligent collecting enterprise by Mushe of Nisibis.
On the basis of the new text sources in Christian Palestinian Aramaic and Syriac, which have only recently come to our attention, a revised text stemma for the five-book version has now to be considered after the one developed by Michel van Esbroeck.\(^{30}\)

The Importance of the Syriac source (BL, Add 14.665, no. 2)

Three folios of Add 14.665, no. 2 preserve vital sections of the middle part for the *Liber requiei Mariae* concerned with Jesus finding the archangel Michael singing with other angels, and Mary and the Apostles in the inner chamber, Mary taking her final breath, then her death, her burial preparation, followed by her interment in the tomb on the Mount of Olives. Most relevant, however, is that it contains a longer paragraph 68 and an additional one 69 on fol. 22 and the content of fol. 23, which covers paragraphs 125-128 of the fifth book adding the apocryphal *History of Peter and Paul* as attested in the early Christian Palestinian Aramaic transmission and in the later Ethiopic one. No text samples of this folio were included by Wright in his collective book on the *Contributions to the Apocryphal Literature*, as he considered the legible letters insufficient to determine the content.\(^{31}\) The text passages transmitted through these surviving four folios are of importance, since they support the early character and originality of the late five-book transmission in Ethiopic.

While Shoemaker was unaware of the existing Christian Palestinian Aramaic and Syriac text witnesses he came to the conclusion that this part might have belonged to a separate apocryphal story outside the five-book circle for the early *Dormition* history that circulated independently in the Middle Ages\(^ {32}\) because of the late separate text source in Christian Arabic from the Monastery of St Catherine (Sinai, Arab. 405),\(^{33}\) and the Garshuni version from the 16th century (Vat., sir. 199).\(^{34}\) The unedited Syriac fol. 23, however, proves that a longer version was extant for Syriac as well as for Christian Palestinian Aramaic, which preserves, for a long time overseen, two folios with the paragraphs 121b-122b and 125b-126a (5th-6th cent.) within the *Codex Climaci rescriptus* (*CCR IV*), originally published by Agnes S. Lewis 1909.\(^ {35}\) This important early witness in this conservative western Aramaic dialect found under the renowned *Codex* was recently reedited with some corrected readings and draws attention to the fact of its

50
relevance and early dating. Therefore, Shoemaker’s viewpoint has now to be revised on the ground of the new and early Aramaic fifth- and sixth-century text witnesses. While the Syriac text transmission deviates here considerably from the early Christian Palestinian Aramaic for the surviving parts of the five books, the late Ethiopian one comes rather close to the Palestinian witness. That the younger Ethiopian and longer text version can be taken as rather authentic for a missing early Greek Vorlage is further supported by the recent publications and insights from the Western Aramaic source, where meanwhile the paragraphs 98-102, 108b-110a surfaced in an early Christian Palestinian Aramaic version. The hardly legible text could be extracted from a double palimpsest manuscript as the lowest text under Sinai, Georgian NF 19, fol. 8-9 (CP2), which was discovered among the New Finds in St Catherine’s Monastery in 1975, and dates to the fifth or sixth century. Until then the complete five-book version with the apocryphal story History of Peter and Paul within the Dormition cycle had been attested only for the late Ethiopian transmission. Both, the text on the two folios from the Codex Climaci rescriptus and the two manuscript relics from the Georgian codex (Georgian NF 19) support the fact that the Christian Palestinian Aramaic version forms here an important intermediate position on account of its closeness to the late Ethiopic version published by Victor Arras. Both are based on a Greek forerunner. CP1 (T-S 16.327+T-S AS 78.401, T-S 16.351, T-S NS 258.140) follows the early short Greek transmission in the first 48 paragraphs.

The here for the first time presented Syriac fol. 23 of Add 14.665 with paragraphs 125b-128b is a significant addition to the early textual evidence of the longer transmission next to Ethiopian and Christian Palestinian Aramaic. On the one hand it speaks for an early tradition of the longer version in Greek from the 4th to 5th century as can deduced from the 5th century surviving witnesses in Syriac, which were all translated in Northern Mesopotamia, and on the other hand it makes the very late Arabic and Garshuni narratives less interesting and reliable, since they are freely retold and date much later. There can be no doubt that all three or four independent Syriac witnesses are drawing their text basis from a longer Greek palm-book version from which no text source has come to light yet.

---

37 The identification and reading process of the palimpsests concerned were undertaken during the Sinai Palimpsests Project helped by the multispectral digital photography through Early Manuscript Electronic Library (EMEL). See the catalogue entries under www.sinai.library.ucla.edu.
40 See Lewis, Acta Mythologica Apostolorum, pp. 150-164 (Arabic); pp. 175-192 (English); van Lantschoot, Contributions aux Actes de S. Pierre et de S. Paul: II”, pp. 219-233.
The parchment itself is flattened and very smooth in giving the impression of a paper-like material making at first glance the distinction between flesh and non-flesh sides difficult. The measurements are 28.57 cm in length and 22.23 cm in width. The ink is honey-coloured. On all four palimpsest folios the lower text is not always fully preserved, i.e. it has often faded in several passages. Mostly the verso (non flesh) sides are affected, but in one instance also the recto (fol. 21r) preserves barely enough remaining legible words to enable an assignment to its content. Obviously external forces like humidity and unsuitable storage conditions damaged and effaced the ink and made the lower script illegible more than that the script was intentionally removed. Only the writing on fol. 23 gives the impression of having been scraped off with some remaining legible lines. Especially at the folds for the later bifolios the letters at the beginning of the lines are either completely illegible or missing on account of the damage to the folio or through later restoration. The upper text was written after a ninety-degree rotation in relation to the lower text on all four folios and thus forming eight bifolios in total. The fact that the four folios are palimpsests makes them a bit less accessible, but enough uncovered letters can be seen to obtain a good impression of the shapes of the script for comparative palaeographic studies, especially on two obverse (fol. 21r, 24r) and one reverse side (fol. 22v).

The lines are 0.5 cm apart and they do not show the usual line justification at the end. The text is divided into two columns with 26 to 27 lines in between them. The last letter(s) in each line in the left-hand column of fol. 24r are missing in the top half, since the folio was here cut to size.

The scribal hands in Add 14.665, no. 2 as well as in Add 17.137, no. 2 (A) are clearly very early Estrangela specimens. The letters here are well executed, foremost the pronounced large written letters. The semkath shows a rather large loop on the left-hand side and also the peh and final kaph tend to be rather large in contrast to the other letters, which is quite typical for fifth- and sixth-century manuscripts. The letters he, waw, and mem have open shapes at the bottom, which can be compared to the early and dated palimpsest

---

41 The reading of the four palimpsest fragments has not been an easy task. It was a very slow process under the unfavourable light conditions in the British Library Reading Room, even with the help of an ultraviolet light reading-lamp (LED torch) which had to be provided by myself, since the equipment was either missing or broken in all reading rooms.

42 For how palimpsests were prepared for rewriting in R. Netz and W. Noel, The Archimedes Codex: Revealing the Secrets of the World's Greatest Palimpsest (London: Phoenix), 2007, pp. 82-83.

43 Wright, Catalogue, vol. I, p. 389, speaks of the leaves being stained and mutilated. This is rather exaggerated for the four folios, which remained complete except for damages mostly at the folds in the new bifolios. The illegibility was caused by the restoration in these areas.

44 Wright, Contributions, pp. 13-16.
examples in BL, Add 14.512 (d. 459). One can claim that they display definitely good and singular witnesses for fine Estrangela hands from the 5th century which were written in North Mesopotamia. Add 14.665 displays an even finer and more elegant stroke than Add 17.137, no. 2 (A). Nothing comparable can be found among the British Library manuscripts material from Deir al-Suryan. The plural dots (؟یام) and the supralinear diacritical dot indicating the feminine suffix as well as the demonstrative pronoun of the far-deixis are regularly employed. A large single dot indicates the end of a sentence or half sentence or the beginning of direct speech, and is only placed on top of a final letter when being a final nun.

Both scripts do not share any scribal resemblance to the third manuscript with the Syriac Obsequies Add 14.484, fols. 1-8, which is of much later date according to the Estrangela characters. Wright, however, pronounced it as one of his eldest manuscript among the Syriac collection. The latter is the only non-palimpsest manuscript for the Obsequies.

Graphical and Lexical Notes

The language in Add 14.665, no. 2 agrees mostly with the rules of Classical Syriac as set out in the reference grammars. There are occasional variations in spellings such as plene ܢܼܠ for ܢܠ (§ 73) and ܐܡ for ܐ in also with suffixes (§§ 69, 73, 126) as can be frequently observed in the manuscripts of the fifth and sixth century. A variety in the spelling for the

45 A useful website for comparative palaeographic samples of dated Syriac manuscripts can be found under dash.stanford.edu. It presents hardly any palimpsests which mostly do not come with colophons and dates.

46 It is a pity that none of the folios have ever been displayed in a photographic format for demonstration of their state or preservation.

47 Wright, Contributions, p. 11. The Estrangela type found on the palimpsest folios under Codex Arabicus and listed as Martin Schoyen Collection 579 (Shoemaker, New Syriac Dormition Fragments, p. 278) is clearly not a fifth-century hand, but must have been written much later according to the palaeographical features and orthography, at least in the 6th century. Concerning its dating it goes with the other sixth-century manuscripts for the mappqana “Transitus Mariae” witnesses, see Brock and Kessel, The ‘Departure of Mary’, p. 116.

48 It is listed as a palimpsest manuscript by A. B. Schmidt, Syriac Palimpsests in the British Library, in V. Somers (ed.), Palimpsestes et éditions de textes: les textes littéraires (Louvain: Peeters, 2009), pp. 161-186, esp. 171.

49 For possible full spellings of ܢܠ and ܐ in early manuscripts compare also Add 14.484, fols. 1-8, which shows occasional ܢܠ (§§ 19, 84), and the older and longer form ܢܪܘ ‘other’ (§ 82) in Wright, Contributions, pp. 204. 205. See A. Merx, Grammatica Syriaca (Halle: Impensis Librarie Orphanothropae, 1867), p. 50; T. Nödeke, Kurzgefasste syrische Grammatik (Leipzig: Tauchnitz, 1898), pp. 5, 44, 92, 99, and A. Ungnad, Syrische Grammatik (Munich: Beck, 1932), pp. 6, 48-49, 89. On more diverting spellings see F. C. Burkitt, Evangelion dampharreshe, vol. 2 Introduction and Notes (Cambridge: Cambridge University Press, 1904), pp. 39-78; D. G. K. Taylor, The Syriac Versions of the De
preposition ܡܲܕ, ܡܲܕܒ to, with. Add 17.137 (A) and Add 14.484 can be noted for the preposition ܡܲܕ with pronominal suffixes, the spelling with aleph ܕܡܲܐܘܗܝ (§ 103), but without only ܝܘ (§§ 67, 70).  

Add 14.665 has been the first Syriac text, in which the Greek word ‘palm-shoot’ ܬܘܠܪܐ (§§ 76, 77) has been attested. It is employed in the Syriac translation as the central technical term for the palm tradition, here a particular part of the palm-pinnate in ܫܒܾܐ ܗܦܐ ܬܘܠܪܐ ܣܨܘܒܣ ܒ’ and take the palm-shoot from this pinnate’ (§ 76). It might support the argument by van Esbroeck that this term stands in the centre of this Marian apocryphon for the Tree of Live being a palm-tree, although the Tree of Live is never mentioned as such in this apocryphon. This might obviously be the reason for the Aramaic translator to retain the Greek term in Syriac instead of using an Aramaic option. Only for the term ‘pinnate’ he chose in the Syriac translation a more indefinite Aramaic lexeme ܫܒܾܐ instead of ܩܘܟܮܐ which would be in the Latin term ramus palmarum. This unique loan ܬܘܠܪܐ has not been registered in the dictionaries since Wright’s publication of 1865. In the meantime ܬܘܠܪܐ is attested thrice in fol. 24r (§§ 76, 77), and appears twice in a slightly different usage ܬܘܠܪܐ ܕܙܝܮܐ ‘olive-branch’ in the second early Obsequies manuscript (Add 17.137 (A), fol. 7r bottom; § 102), where the dove receives the olive-branch from Enoch for Noah as a sign of God. Another early Greek loan to be noted is ܦܘܗܝ < ἀγκών ‘his elbows’ (§ 73), which has been known so far only from a few early texts in this spelling without the expected nun, e.g. the Commentary on Leviticus by Ishodad of Merv. It

---

50 This orthographical difference is not treated in the reference grammars by Nöldeke, Kurzgefasste syrische Grammatik, and R. Duval, Traité de grammaire syriaque (Paris: Vieweg, 1881).
51 Syriac adapted the Greek noun θαλλόσ from the word stem θάλλω ‘to sprout, grow, thrive’ by adding the emphatic ending as replacement for the Greek nominative ending -οσ. See how Greek nouns were treated in Syriac S. P. Brock, Greek Words in Syriac, Scripta Classica Israelica 15 (1996), pp. 251-262, esp. 254.
52 It is noteworthy that all the early Syriac witnesses and also the Christian Palestinian Aramaic version for the palm tradition show hardly any Greek influence. See Müller-Kessler, Obsequies of My Lady Mary (I), pp. 40-41; Müller-Kessler, “Three Early Witnesses”, p. 86.
56 In the Latin version just palma Wenger, L’Assomption de la T.S. Vierge, pp. 245-246, 249, 254.
57 See on the attestations of this special Greek foreign word Müller-Kessler, Obsequies of My Lady Mary (I), pp. 41-42.
should be stressed that all the remaining early Syriac witnesses of the palm tradition show hardly any Greek influence apart from these two special particles ܓܝܪ, ܕܝܨ, and the verb ܦܝܫ, and some technical loans.⁵⁹

Another novelty is the special use of ܓܨ (§ 68) as the preposition ‘on the side’, which so far has been only known from Mandaic and Babylonian Talmudic Aramaic in the sense ‘bank, on the side’.

Noteworthy is the omission of ܒ in the possessive suffix third plural masculine ܦܘܗܪܘܢ ‘their light’ (§ 69). ܪܗܝܘ is definitely an error for the singular ܪܗܛ (§ 73).

Sometimes the endings in the perfect for the third plural masculine are ܘ as in ܝܩܣܝ ‘(all) became blind’ (§ 73), and for the plural feminine ܕܒܩ ‘(his hands) stuck’; ܐܬܦܪܩ ‘they (fem.) were raptured’ (§ 73); ܡ ‘(his hands) remained’ (§ 73).

The Syriac version of the Liber requiei Mariae seems to have had different and larger text divisions than the later Ethiopic one, as can be deduced from fol. 22r, where the new section starts before Mary opens her mouth corresponding with G1 § 33. § 67 in E1, fol. 22v has the end of G1 § 35 and E1 § 69, after ‘their light’ the end of § 39 in G1 and § 73 in E1 is indicated in fol. 21v. These are the only examples of obvious subdivisions noticeable in the surviving Syriac manuscripts. Paragraphs §§ 68-69 are only found in the Ethiopic transmission⁶¹ and here in the Syriac one, but not in the short Greek version.⁶²

---

⁵⁹ Müller-Kessler, Obsequies of My Lady Mary (I), p. 42.
⁶⁰ Might refer back to the eyes, which are treated grammatically as feminine.
a) Sequence of the folios according to the upper text as bound now in BL, Add 14.665, no. 2.

63 For the re-use of the upper text the lower one was turned by 90 degrees and the original divided into a bifolio. Such procedures are common in the re-employment of parchment, see also Netz and Noel, *The Archimedes Codex*, pp. 82-83.

64 The sides of the folio in parenthesis are indicated according to the upper text.

65 The Ethiopic subdivision is here given preference as in the editions for the Christian Palestinian Aramaic transmission and the other Syriac source (Add 17.137, no. 2), although it does not always agree with the Syriac versions. The Greek allocation of chapters is considered to see whether it is applicable. Both divisions form only a working basis and do not imply anything conclusive for the Syriac transmission. See also Müller-Kessler, “Three Early Witnesses”, pp. 89-91; Müller-Kessler, “An Overlooked Christian Palestinian Aramaic Witness”, pp. 88-98; Müller-Kessler, *Obsequies of My Lady Mary (I)*, pp. 39, 49-54.

66 Wright, *Contributions*, p. 16 could not assign the passages on this folio because of the hardly legible script. The text version is on the one hand partially overlapping with the Christian Palestinian Aramaic one as surviving in CCR IV, fol. 12v (r), but the remaining text is considerably deviating from the CPA and Ethiopic witnesses. The latter two are surprisingly close despite their long transmission gap.

67 The lower Syriac text on fols. 22-24 is found bound upside down (turned by 180 degrees) in the collective volume.

68 The Syriac version tends to have sometimes a longer text than the surviving shorter Greek one. The division by paragraphs can only be taken as tentative.

69 It is conceivable that only one folio is missing here.
### Text\(^1\) and Translation of BL, Add 14.665, no. 2

Since no adequate transliteration and translation has been offered till today for the lower text of the four folios of Add 14.665, no. 2 a first tentative reading of the *Obsequies* text is presented here, since it provides unparalleled text passages as well as new lexical items. Not all readings could be established since the preservation of the script on some reverse sides is very faint or hardly visible.

\(^{70}\) Wright, *Contributions*, p. 16 could not assign the appropriate passages to it on account of the hardly legible text.

\(^{71}\) Passages read by Wright, *Contributions*, pp. 14-15 are indicated by ‡‡...‡‡ and new additions not found in Wright, *Contributions* by *...* . The palimpsest is at times impossible to read on account of the light conditions in the reading room at the British Library. Not clearly visible letters are indicated by ..., other sections missing through restoration and darkening of the parchment are indicated by [...].

\(^{72}\) Wright, *Contributions*, p. 14: 

\(^{73}\) This is obviously a paragraph division for the Syriac text according to the special signs, which deviates from the Ethiopic subdivision.
I bless you, my blessed Lord, my Master, I bless you, who did what was promised to me so that I did not measure you (by what) you had promised. And for what you did you leave your angels upon my soul, but by coming to me? The Lord did not reply. ‘Have I done everything for you of which I have been found worthy? For was I not a humble one so that I was found worthy of this glory?’ And after

75 Wright, Contributions, p. 14: ¶...¶...¶
76 Wright, Contributions, p. 14: ¶...¶...¶
77 ¶...¶ : This additional half sentence is neither found in G1 nor E1.
78 Three lines are damaged here and difficult to read.
79 ܢܘܕ cannot mean ‘arm’ in this context. It is employed here as a preposition. Such usage is not attested so far for Syriac (see above). The reading of the last letter ܝ is questionable.
80 ¶...¶ : Greek and Ethiopic deviate here considerably from the Syriac by having a shorter text and speaking of her body being ἐπτάπλαςίῳ ἑπτάπλαςίῳ ‘seven times whiter than the sun’ (G1) and ቈፋአዳወፋአ ‘and her whiteness is seven times in cubits’ (E1).
Obsequies of My Lady Mary (II)

us will have a shining soul like Mary’s.’ Jesus said to Peter,

Ma[ry] had said these (things),

her spirit departed from her body,

her face was wrapped in kindness

All these souls,

‘Remember me, God found the body... because...

are coming and are choosing.

Thus their souls are shining,

because they are from the holy places,

but [...]...

from their bodies

not found weeping,

because...

found...

... the body...

... the king of [...] remember [...] above [...] because [...] of which we will be careful...

1. in a new tomb,

place the body

of Mary

as I have commanded you.

5. And after he had said these (things)

... to Peter ...

... the body

of Mary and he said,

‘Remember me, God

... to Peter ......

... the body ...

... the king of [...] remember [...] above [...] because [...] of which we will be careful...

81 Wright, Contributions, p. 14: *... nil.
82 The spelling ၃ in § 70 (fol. 22vb25). Charles Naffah suggested to me in an email correspondence that it does not speak of the ‘Blessed’, but of ‘kindness’. There is a whole in the vellum, where the beth should be.
83 Greek and Ethiopic differ here ἐπλήρωσεν αὐτῆς τὴν ἀκομαία ‘she fulfilled the course of her life’ and በእልከ ተበላ ‘she fulfilled her duty’.
84 Wright, Contributions, p. 14: *... nil.
85 Wright, Contributions, p. 14: ፍልቅል.
86 The left hand column is darkened in the middle and the letters are not legible.
15. [...] you [...] his sleep [...]

[......] [......] like the dead one which you will watch.

[......] [......] Often I said concerning them,

The demonic (way) I gal[v]e you,

from my evilness are the signs,

and it will be like from the body, of which the soul,

is found shining as their light.97

20. [......] [......]

which is near [...] which you brought of the kindness to you. He intimated (?)

... the body, of which the

soul,

is found shining as their light.97

Again Jesus said G36/E70 to Peter, 'Watch kindly her body, and take care88

not to drop (it) outside of the town

25. one of four by

grasping you and be careful

And Peter said to John, You are a virgin

and a plague(?). And...

which threw themselves before the bier,
when you carried it.’ He said,

1. they did not know to where they could go. One of them hold onto in ... And when the high priests heard much clamour of those who were singing hymns, they were disturbed.
a way that he could leave and go.

5. And after he had come toward the Apostles and saw the crowned bier and the Apostles who were singing hymns, he responded and said to them in [great] rage,

10. ‘Mary went out from the world by the Apostles

15. of that pinnate to throw it down to that body on

And the priests were saying to one another, ‘There is a great uproar.’ And one of them answered and said to them, ‘Mary went out from the world by the Apostles

90 Wright, Contributions, p. 14: †...†.

91 This line and the following half lines are broken off from the folio.

92 An alternative reading, which would be possible is ששת א by which you do?’ And he rose in rage and ran toward that bier, and grasped it, and tried to throw it on the ground, and hold on to that place of that pinnate to throw it down to that body on

And at once they came out with swords and rods to kill the Apostles
Obsequies of My Lady Mary (II)

20. the ground. And at once his hands stuck to the bier and they were raptured from his elbows, and his hands remained as hanging onto the bier, who were in the cloud. (63)\(^93\) The angels came out from the cloud by God's command and smote them with blindness. And they all became blind, so that they knocked their heads onto the walls, because

25. and that other half remained on his body. who did as had been commanded to him. And wherever it was as where it was before, when Something

3a. fol. 24r [flesh side] — §§ 43-44 §§ 76-77 — Wright, Contributions, p. 15 (partially published) (Pl. I)

1. and saying, ‘Woe to us, of the matter which was also upon us in Sodom, which at one[e] devoured that one with blindness.\(^90\)

\(^93\) Wright, Contributions, p. 14: *...* mil.

\(^94\) Wright, Contributions, p. 15: סָדָמ. Concerning the reading for סָדָמ, one should point out that the top line of qof is obviously damaged by a scratch on the vellum. The expected nun before qof is missing, since there is not enough space between aleph and qof. The Greek loanword is regularly spelled without nun in the early Syriac MSS. What it has to mean is clear from the Greek version which has here τῶν ἄγκων 'elbows' translated by Shoemaker, Ancient Traditions, p. 367 generally as 'arms'. For סָדָמ < ἄγκον 'bend of the arm, elbow' see H. G. Liddell and R. Scott, A Greek-English Lexicon (Oxford: Oxford Press, 1897; reprint 1958), p. 10b; For more attestations see C. Brockelmann, Lexicon Syriacum (Halle: Niemeyer, 1928), p. 45.

\(^95\) Wright, Contributions, p. 15: עַבָּד.

Abstract: This Syriac palimpsest manuscript with four remaining folios bound with others into one volume runs under the shelf mark Add 14.665, no. 2 in the British Library. It displays a well-executed 5th century Estrangela. William Wright in his Contributions to the Apocryphal Literature of 1865 offered only...
readings of some scanty passages. The text has been neglected ever since. Preserved in it are sections of an early witness for the *Obsequies of My Lady Mary* in Syriac (S1) covering the final part of the second book, the beginning of book three, and central sections of book five with the apocryphal History of Peter and Paul according to the Ethiopic five-book cycle. The textual diversity is at times considerable in comparison to the other early transmissions in Greek and Christian Palestinian Aramaic, and the much later Ethiopic one. It has been the first Syriac source to attest the central term for the palm tradition ܡܠܫܐ 'palm-shoot'. The new and additional readings intend to fill some lacunae in the only partially preserved transmission of the early Syriac translation of the *Dormition of Mary* from Upper Mesopotamia.

**Keywords:** Christian Palestinian Aramaic; Deir al-Suryan; *Dormition of Mary*; Ethiopic; Mushe of Nisibis; *Obsequies*; Palimpsest; Palm-shoot; Syriac.

Contribuciones a la literatura apócrifa de 1865 ofreció solo lecturas de algunos pasajes escasos. El texto ha sido descuidado desde entonces. En él se conservan secciones de un testimonio temprano de las exequias de My Lady Mary en siríaco (S1) que cubre la parte final del segundo libro, el comienzo del libro tres y las secciones centrales del libro cinco con la Historia apócrifa de Pedro y Pablo, según el ciclo etíope de cinco libros. La diversidad textual es a veces considerable en comparación con las otras transmisiones tempranas en arameo palestino griego y cristiano, y el etíope mucho más tardío. Ha sido la primera fuente siríaca en atestiguar el término central para la tradición de la palma ܡܠܫܐ 'brote de palma'. Las lecturas nuevas y adicionales tienen la intención de llenar algunas lagunas en la transmisión sólo parcialmente conservada de la traducción siríaca temprana de la *Dormición de María* de la Alta Mesopotamia.

**Keywords:** Arameo cristiano palestino; Deir al-Suryan; *Dormición de María*; Etiópico; Mushe de Nisibis; *Obsequios*; Palimpsesto; Brote de palma; Siríaco.
