

### DETAILS OF THE SUBJECT

**Title (of the subject):** DESARROLLO DEL PENSAMIENTO MATEMÁTICO

**Code:** 100757

**Degree/Master:** GRADO DE EDUCACIÓN INFANTIL

**Year:** 1

**Name of the module to which it belongs:** APRENDIZAJE DE LAS CIENCIAS DE LA NATURALEZA, DE LAS CIENCIAS SOCIALES Y DE LAS MATEMÁTICAS

**Field:** DESARROLLO DEL PENSAMIENTO MATEMÁTICO

**Character:** OBLIGATORIA

**Duration:** FIRST TERM

**ECTS Credits:** 6

**Classroom hours:** 60

**Face-to-face classroom percentage:** 40%

**Non-contact hours:** 90

**Online platform:** moodle

### TEACHER INFORMATION

**Name:** JIMÉNEZ FANJUL, NOELIA NOEMI (Coordinador)

**Faculty:** Facultad de Ciencias de la Educación

**Department:** MATEMÁTICAS

**Area:** DIDÁCTICA DE LA MATEMÁTICA

**Office location:** Facultad de Ciencias de la Educación, 1<sup>a</sup> planta, módulo A

**E-Mail:** noelia.jimenez@uco.es

**Phone:** 957218942

**Name:** MAZ MACHADO, ALEXANDER

**Faculty:** Facultad de Ciencias de la Educación

**Department:** MATEMÁTICAS

**Area:** DIDÁCTICA DE LA MATEMÁTICA

**Office location:** Facultad de Ciencias de la Educación, 1<sup>a</sup> planta, módulo A

**E-Mail:** ma1mamaa@uco.es

**Phone:** 957218942

**Name:** MONTEJO GÁMEZ, JESÚS

**Department:** MATEMÁTICAS

**Area:** DIDÁCTICA DE LA MATEMÁTICA

**E-Mail:**

**Phone:**

### Specifics of the subject

### REQUIREMENTS AND RECOMMENDATIONS

#### Prerequisites established in the study plan

There are no previous requisites.

#### Recommendations

It is strongly recommended to attend classes and actively participate in.  
It is advisable that students have at least a B-1 level in English (no certification required).

## SKILLS

- CB1 Students have demonstrated knowledge and understanding in a field of study that builds upon their general secondary education, and is typically at a level that, whilst supported by advanced textbooks, includes some aspects that will be informed by knowledge of the forefront of their field of study.
- CB2 Students can apply their knowledge and understanding in a manner that indicates a professional approach to their work or vocation, and have competences typically demonstrated through devising and sustaining arguments and solving problems within their field of study.
- CB4 Students can communicate information, ideas, problems and solutions to specialist and non-specialist audiences.
- CE1 Knowledge of the objectives, curriculum content and assessment criteria in early childhood education.
- CE11 Reflect on classroom practices to innovate and improve teaching. Acquire habits and skills for independent and cooperative learning and promote them in students.
- CM8.1 Knowledge of the scientific, mathematical and technological foundations of the curriculum at this stage as well as theories on the acquisition and development of the relevant subject areas.
- CM8.2 Knowledge of teaching strategies for developing numerical representations and spatial, geometric and logical notions.
- CM8.3 Understand mathematics as sociocultural knowledge.

## OBJECTIVES

1. To realize of the importance of mathematical learning as an essential part for the overall people development.
2. To know the mathematical concepts that integrate the early childhood curriculum.
3. To learn the theoretical foundations of the elementary mathematics.
4. To develop professional skills that allow a close connection between mathematical knowledge and its didactic.
5. To understand and manipulate specific mathematical teaching materials in early childhood education.

## CONTENT

### 1. Theory contents

The course is divided into five sections or modules according to its main topics. The first one is devoted to foundation aspects of mathematics teaching and the remaining ones are devoted to the main mathematical topics and their didactic.

- Section 1: Foundations in early childhood mathematics education.  
Section 2: Development of children logical mathematical reasoning.  
Section 3: Number in early childhood education.  
Section 4: Development of children geometrical thinking.  
Section 5: Magnitudes and measures in early childhood education.

### 2. Practical contents

1. Practices with manipulatives used for teaching mathematics in early years.
2. Planning a teaching class (project).

## METHODOLOGY

### General clarifications on the methodology. (optional)

The Content And Language Integrated Learning (CLIL) methodology will be used to enable a "natural" environment for both content and language learning, and to acquire fluency and specific vocabulary throughout the course. Students will be asked to actively participate in class (and virtual forum) and group-work based learning will be mainly used.

All the materials will be provided in English, including exam, and other assessment instruments. Explanations will be led in English as well. Within CLIL methodology Spanish language will be used in order to clarify and reach the objectives, whenever it is required. Student participation may be in both English and Spanish (although, English will be appreciated).

### **Methodological adaptations for part-time students and students with disabilities and special educational needs**

Part-time students must put in contact with the teacher so as to reach an agreement about the specific development of the subject and the due dates of the activities to be carried out.

#### **Face-to-face activities**

Activity	Large group	Medium group	Total
<i>Assessment activities</i>	4	-	4
<i>Group work (cooperative )</i>	4	3	7
<i>Lectures</i>	28	-	28
<i>Text analysis</i>	3	-	3
<i>Tutorials</i>	2	-	2
<i>Workshop</i>	4	12	16
<b>Total hours:</b>	<b>45</b>	<b>15</b>	<b>60</b>

#### **Not on-site activities**

Actividad	Total
<i>Bibliographic consultations</i>	8
<i>Exercises</i>	20
<i>Finding information</i>	8
<i>Group work</i>	12
<i>Problems</i>	12
<i>Self-study</i>	30
<b>Total hours:</b>	<b>90</b>

### **WORK MATERIALS FOR STUDENTS**

Internship notebook  
Dossier  
Exercises and problems

#### **Clarifications:**

Materials will be provided through moodle.

## EVALUATION

Skills	Tools		
	Assignments and projects	Final exam	Seminars
CB1		x	x
CB2	x	x	
CB4		x	
CE1	x	x	
CE11	x		x
CM8.1	x	x	
CM8.2	x	x	
CM8.3	x		
<b>Total (100%)</b>	10%	60%	30%
<b>Minimum grade.(*)</b>	<b>5</b>	<b>5</b>	<b>5</b>

(\*) Minimum grade necessary to pass the subject

**¿Valora la asistencia?: No**

### General clarifications on instruments for evaluation:

Partial qualifications will be kept until the end of the current academic period.

The practices (second column in the table above) and project (second column in the table above) are of compulsory attendance for all the students. Students with a justification absence of more than the 20% of the practices will be evaluated of the practices during the final exam.

A minimum grade of 5 is required in all the instruments specified (final examen, practices and project) so as to pass the subject. Otherwise, the student will be graded with the maximum of the failed part.

### Clarifications on the methodology for part-time students and students with disabilities and special educational needs:

Part-time students will be provided with specific learning conditions. Contact the professor. Nevertheless, they must pass every of the assessment instrument.

**Qualifying criteria for obtaining honors:** *A criterio del profesorado, siempre y cuando se cumpla los requisitos reseñados en el reglamento*

**¿Hay exámenes/pruebas parciales?: No**
