COURSE DESCRIPTION

METHODOLOGY

General clarifications on the methodology (optional)

Those who certify by means of proof the impossibility of regular class attendance, may pass the subject as long as, after meeting with the teaching staff to be informed of the evaluation system to be applied, they submit in a timely manner as many works, reviews and exercises, as determined, using for this the tutoring time that the professor deems necessary. The student must communicate his/her particular condition sufficiently in advance: at the beginning of the semester or, as the case may be, as soon as possible supervening causes make it necessary to adopt blended learning.

Methodological adaptations for part-time students and students with disabilities and special educational needs

Methodological adaptations for students with disabilities and special educational needs: reasonable adjustments will be made according to the particular needs of the students to guarantee his/her individual rights under equal conditions.

COURSE DESCRIPTION

Attendance will be assessed?:

No

General clarifications on instruments for evaluation:

Throughout the course, individual work and projects will be carried out. Its development will be done both face-to-face in the classroom, and non-face-to-face, work at home. These works and activities will be valued as a whole with 20% of the final grade (10% resolution of problems and exercises, 10% case study) The minimum grade required to pass the subject in these works of 5 (out of 10). The Project (group work) must be carried out throughout the course, and will be presented at the end of the semester. The weighting of the final mark will be 20% and it will be necessary to obtain a minimum mark of 5 (out of 10). The final exam will consist of a theoretical multiple choice test that will account for 30% of the final grade, and a case resolution test and practical assumptions that will account for 30% of the final grade. In order to apply the percentages set forth above, the student must pass the final exam and must achieve a minimum of 5 points (out of 10) in each of the parts of the exam (theory and practice).

Valid during current academic year.

Clarifications on the methodology for part-time students and students with disabilities and special educational needs:

Throughout the course, individual work and projects will be carried out. Its development will be done both face-to-face in the classroom, and non-face-to-face, work at home. These works and activities will be assessed as a whole with 20% of the final grade (10% resolution of problems and exercises, 10% practice notebook) The minimum grade required to pass the subject in these works of 5 (out of 10). The Project (group work) must be carried out throughout the course, and will be presented at the end of the semester. The weighting of the final mark will be 20% and it will be necessary to obtain a minimum mark of 5 (out of 10). The student enrolled with difficulty to meet the required percentage of participation, must carry out an additional work whose effort will be proportional to the number of hours of non-attendance, work on which he/she will make a presentation at the end of the semester. The content and requirements of said work will be defined by the professor. The final exam will consist of a theoretical multiple choice test that will account for 30% of the final grade, and a case resolution test and practical assumptions that will account for 30% of the final grade. In order to apply the percentages set forth above, the student must pass the final exam and must achieve a minimum of 5 points (out of 10) in each of the parts of the exam (theory and practice).

Clarifications on the evaluation of the extraordinary call and extra-ordinary call for completion studies:

The final grade that is collected in the minutes of both meetings will correspond to 100% of the grade obtained in the exam.

Qualifying criteria for obtaining honors:

Obtain the maximum score and a grade equal to or greater than 9.
