## Section B. SUMMARY OF THE CURRICULUM

I am senior lecturer at the University of Córdoba, Spain, where I obtained a tenured position in 2002. I completed my doctorate in 1997 with a PhD. with the title 'Intensification: study of a classeme', supervised by Prof. Kees Hengeveld (University of Amsterdam). I have been a visiting scholar at the University of Amsterdam, the University of New York at Buffalo and Anglia Ruskin university (Cambridge), where I was awarded a grant by the European Science Foundation (ESF) to do some research on the project 'A distributional approach to English Adjective-Noun sequences', as part of the activity 'European Network on Word Structure: Cross-disciplinary Approaches to Understanding Word Structure in the Languages of Europe (NetWordS)'.

My research is centered on lexical and morphosyntactic issues following functional and cognitive approaches and has been conducted within the frame of the PAIDI group 'Lingüística Cognitiva y Funcional' (HUM-693) of Andalusian Research Plan. Over the past decade I have published several articles on a range of topics, with a focus on the study of processes at the interface between the lexicon and grammar, such as conversion and compounding, as well as on the study of different derivational processes from a theoretical perspective. Many of these publications have a functionalist orientation, and take the perspective of Functional Discourse Grammar (FDG), while a second group of articles explore different topics within cognitive approaches, such as Construction Morphology. These articles were published in well-respected journals like Linguistics, Lingua, Corpus Linguistics and Linguistic Theory, English Language and Linguistics, Review of Cognitive Linguistics, Word Structure and Atlantis. In addition, I have published different book chapters in volumes published by John Benjamins or Equinox. I have recently co-edited a Special Issue on Derivational Morphology in Functional Discourse Grammar in the journal Word Structure. Over the last few years I have worked on

the empirical study of conceptual metonymy in grammar and discourse, as part of a project funded by the Spanish Ministry of Education and Innovation (FFI 2008-04585/FILO). E-mail: ff1pomuc@uco.es
